CLASSIFICATION OF DAFFODILS

FOR USE AT ALL EXHIBITIONS OF

The Royal Horticultural Society.

[*By order of the Council.*]

[1916.]

The enormous increase of late years in the number of named Daffodils and the crossing and inter-crossing of the once fairly distinct classes of *magni-medio-* and *parvi-coronati* into which the varieties have hitherto been divided have made it imperatively necessary to adopt some new or modified Classification for Garden and Show purposes.

In the Spring of 1908, the Council of the Royal Horticultural Society appointed a Committee to consider the subject, and as a result of its labours all known Daffodils were divided into Seven Classes, and a Classified List was published in the same year. This method of Classification failed to meet

with general acceptance, and numerous modifications were suggested, consequently the Council reappointed the Committee, in 1909, to further consider the matter, with the result that the system of Classification now put forward by the authority of the Royal Horticultural Society was arranged. In 1915 the Leedsii Class (IV.) was sub-divided to bring it into line with the Incomparabilis and Barrii Classes.

The Committee ask for assistance in amending the list wherever (as is unavoidable) they may have been misinformed regarding any particular flower. It is not for a moment assumed that the following list is either faultless or complete, and it will probably require a good deal of emendation year after year as new crosses are made and new names have to be added.

The numeral preceding each name indicates the class or division in which the variety has been placed, and when no numeral is affixed, it will be understood that the variety was not sufficiently well known to any of the Committee to justify them in classifying it. In such cases information, and if possible, a specimen flower would be acceptable.

The name in brackets following the name of a Daffodil, is that of the raiser so far as has yet been discovered; in other cases it is that of the introducer or owner of the stock.

The names in italics represent species or well marked varieties, wild types and natural hybrids. The names in small type, printed at the end of the General List, indicate varieties either lost to cultivation, or surpassed by modern varieties.

The eleven Divisions are as follows:—

Division I.—TRUMPET DAFFODILS.

Distinguishing character—Trumpet or crown as long **as** or longer than the perianth segments.

- (a) Varieties with yellow or lemon-coloured trumpets, and perianth of same shade or lighter (but not white).
- (b) Varieties with white trumpet and perianth.
- (c) Bi-color varieties, *i.e.*, those having a white or whitish perianth and a trumpet coloured yellow, lemon, or primrose, &c.

Division II.—INCOMPARABILIS.

Distinguishing character—Cup or crown not less than one-third but less than equal to the length of the perianth segments.

(a) Yellow shades with or without red colouring on the cup.

(b) Bi-color varieties with white or whitish perianth, and self-yellow, red-stained, or red cup.

Division III.—BARRII (INCORPORATING BURBIDGEI).

Distinguishing character—Cup or crown less than one third the length of the perianth segments.

(a) Yellow shades, with or without red colouring on the cup.

(b) Bi-color varieties with white or whitish perianth and self-yellow, red-stained, or red cup.

Division IV.—LEEDSII.

Distinguishing character—Perianth white, and cup or crown white, cream or pale citron, sometimes tinged with pink or apricot.

(a) Cup or crown not less than one third but less than

equal to the length of the perianth segments.

(b) Cup or crown less than one third the length of the perianth segments.

Division V.—TRIANDRUS HYBRIDS.

All varieties obviously containing *N. triandrus* blood, such as Queen of Spain, Earl Grey, Eleanor Berkeley, Moonstone, Agnes Harvey, etc.

Division VI.—CYCLAMINEUS HYBRIDS.

Division VII.—JONQUILLA HYBRIDS.

All varieties of *N. Jonquilla* parentage, such as Buttercup, odorus, etc.

Division VIII.—TAZETTA AND TAZETTA HYBRIDS.

To include *N. Tridymus*, Poetaz varieties, the Dutch varieties of *Polyanthus Narcissus*, *N. biflorus*, *N. Muzart*, and *N. intermedius*.

Division IX.—POETICUS VARIETIES.

Division X.—DOUBLE VARIETIES.

Division XI.—VARIOUS.

To include *N. Bulbocodium*, *N. cyclamineus*, *N. triandrus*, *N. juncifolius*, *N. gracilis*, *N. Jonquilla*, *N. Tazetta* (sp.), *N. viridiflorus*, etc.

The names of new varieties for Registration, and information respecting unclassified or wrongly classified varieties, should be sent to Mr. Charles H. Curtis, Hon. Sec. R.H.S. Daffodil Committee, 2, Adelaide Road, Brentford, Middlesex. When lists of new varieties are sent, the names should be arranged in alphabetical order to facilitate Registration.

REGISTRATION OF DAFFODIL NAMES.

The following rules have been enacted by the Council after consultation with the Narcissus Committee :—

1. A Registration Fee of 2s. 6d. must be paid to the Hon. Secretary of the Narcissus Committee for each plant name registered.
2. Those who register Daffodils must, after registration, notify the Hon. Secretary of the Narcissus Committee a

few days before the meeting at which it is intended to exhibit the flower, in order that the registered name may be confirmed.

(Registration and Entry Forms, B and C can be obtained on application to the Hon. Secretary of the Narcissus Committee*).

3. If flowers of plants registered be not exhibited for confirmation of name at one of the R.H.S. meetings within a period of 5 years from the date of registration, the registration will lapse and the name having been erased from the Society's list will again become free for adoption. Special arrangements will be made so as to exempt Australian and New Zealand plants from this 3rd enactment.

4. Rules 2 and 3 are to be considered to have been in force from the 1st January, 1914.

* Any one purchasing the stock from the person who registered the name

will be held to stand in such person's place. If, therefore, the seller has not already confirmed the registered name, the purchaser should be careful to see that when the stock is sent to him the Forms B and C are sent with it.

The Narcissus Committee are instructed by the Council to refuse in future to register names which are either so nearly like existing names as to be likely to cause confusion, or such as are foolish, or are phrases and not names at all.
